

CUMULUS: Lift-off into Cloud!

End-to-end business management solution on the cloud for Small to Medium Enterprises (SMEs). One solution to manage your Financials, Human Resources and Logistics.

How can you realise the benefits of integrated business management software without the time, cost, or resources required to implement an OnPremise solution?

Twenty Third Century Systems (TTCS) is offering Cumulus, a cloud based leading business software specially designed for small to medium enterprises. It allows companies to holistically streamline operations and increase business insight with a complete, integrated solution which is hosted online. Users can manage all aspects of a business with Cumulus. The functionality of the solution enables the management of businesses seamlessly, from end to end.

Cumulus is built on SAP Business One Cloud; meaning that the solution is hosted online, thus, there is no need to spend thousands of dollars

on hardware and software to get access to the best business management solution – users simply subscribe and get instant access.

With Twenty Third Century Systems hosting the solution, running expenses such as IT overheads associated with managing the hardware and software are cancelled, ensuring that businesses run on an affordable, cost-effective mission critical business management solution.

Lift-off to the cloud. With Cumulus, the SAP Business One Cloud solution, you can get the essential business software your small business needs for a per-user subscription fee via cloud.

Contact us to for more information on the product and pricing.

What is Cumulus?

Cumulus, the cloud based business management solution, provides SMEs or subsidiaries of large companies with a single software solution to manage critical business processes in a cloud-based offering. You pay a subscription fee per user, and TTCS takes care of the rest.

BUSINESS CHALLENGES

- Limited access to information that can support decisions to manage your entire business
- Fragmentation of operational business processes through unsynchronised and parallel data management
- Data redundancy through duplicate entries, errors and delays
- Limitations in acquiring efficient enterprise resource planning systems owing to expensive hardware and software costs

KEY FEATURES

- Complete, integrated functionality—Deploy quickly with essential functionality and fulfil specialised needs with add-on solutions
- Transparent costs—Maintain control with one payment that covers software, service and support
- Ongoing innovation—Stay current with the latest technology—hassle free—with a cloud solution that is automatically maintained and updated
- World-class security—Rest easy knowing your data is being protected in secure data centres with an array of physical and network safeguards
- Quality partner support—Deploy with confidence by working with TTCS, a trusted SAP Gold Partner

BUSINESS BENEFITS

- Streamline operations and increase business insight with a complete, integrated, on-demand solution
- Reduce IT cost by avoiding

the large capital investment required by traditional software implementations

- Minimise ongoing IT overheads by decreasing the need to hire experienced IT staff to manage and support your hardware and software
- Increase business agility by rapidly deploying support for business processes to take advantage of new opportunities

Why Cumulus?

PROVEN SOFTWARE DEPLOYED ON CLOUD

Tens of thousands of small businesses worldwide recognise the benefits of using SAP Business One. Designed specifically for SMEs, the software lets you integrate all the critical functions you need to run your entire business. It enables you to make decisions based on the most updated information, it streamlines processes, and it accelerates profitable growth.

With Cumulus, the SAP Business One Cloud solution, small and medium sized businesses can realise the benefits of this software without the cost or complexity of an OnPremise deployment. Managed and hosted by TTCS, it provides web-based access to our proven and powerful business management software. You can get up and running quickly for a predictable user fee that covers software, service and support.

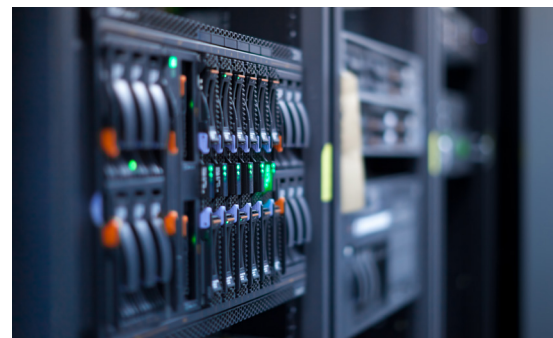

GET STARTED AND KEEP MOVING

To get started with Cumulus, contact TTCS, sign up for the service you want, and start running your operations on world class SAP software. You can implement the software faster than you can with an OnPremise solution, and we'll guide you along the way to help ensure a smooth deployment. As your needs change, you can adapt and extend the software with add-on solutions that have been built by our software solution and technology experts to fulfil industry-specific and other needs.

Cumulus also provides worldwide coverage so you can confidently support your overseas operations.

ACCELERATE YOUR TIME TO VALUE

By leveraging a software-as-a-service model and the expertise of

TTCS, you can dramatically accelerate time to value with Cumulus. By subscribing, you simply 'plug and run'.

You can select the number of users and duration of your agreement on the basis of your business needs. Cumulus is automatically maintained and updated by TTCS, so you always have the most current technology. Applications and servers are located in highly secure data centres that feature an array of physical and network safeguards to protect sensitive business data. With no hardware to manage or software to maintain, you can focus on your core business - not IT.

REALISE A LOW TOTAL COST OF OWNERSHIP

With Cumulus, you can streamline operations and increase business insight with minimal cost and complexity. Because the software is delivered as a service, you don't need to hire experienced IT staff to manage and support your software and its underlying IT infrastructure. The software also increases your business agility so you can rapidly deploy support for business processes to take advantage of new opportunities.
