## CHALLENGES FACED BEFORE IMPLEMENTATION

- All sales and purchase transactions were manually processed
- Record-keeping was a challenge
- Slow speed of processing management reports from transactions done
- Implementation of budget while working outside the system

As NOCMA continued to grow so did it transactions. It was at this point that NOCMA realised something had to be done to solve the challenges faced. Management thought of way to simplify work for employees and the whole organization in general. A decision was made to procure an ERP system to resolve the challenges.
